Mohammed Diaa Al-Mlmslmane

Full Stack Developer | .NET Core & Angular

☑ diaa09414@gmail.com 📞 +963960068926 📍 Syria - Damascus 📅 14/4/2003 Portfolio: diaatube.github.io

About Me

"Full Stack Developer skilled in building scalable web applications using .NET Core and Angular. Experienced in architecting multi-tenant SaaS solutions, Domain-Driven Design (DDD), real-time applications, and delivering high-performance digital solutions."

Professional Experience

Full-Stack Developer | Varx

2025 – Present

- Architect and develop multi-tenant enterprise web applications using **ABP Framework**, **.NET Core**, and **Angular**.
- Apply **Domain-Driven Design (DDD)** principles and the **Repository Pattern** for clean, scalable, and maintainable software architecture.
- Design and optimize relational database models using **SQL Server**, **Entity Framework Core (EF Core)**, and **ADO.NET**.
- Implement asynchronous background automation using **Cron Jobs**, **Background Jobs**, **SignalR** for real-time notifications, and email verification.
- Participated in refactoring a single-tenant legacy POS system into a modern multi-tenant **SaaS platform** supporting multi-database architectures.
- Build responsive and modern admin dashboards using **Angular**, **Tailwind CSS**, and **PrimeNG**.

Full-Stack Developer | Gamma Tech

2025

- Engineered scalable web applications and RESTful APIs connecting Angular dashboards with SQL Server databases.
- Developed an E-Commerce Fashion platform featuring product catalog management, shopping cart functionality, and order processing.

Skills

Languages:	C#, TypeScript/JavaScript
Frameworks:	.NET Core, ASP.NET Core, Angular, ABP Framework
Databases:	SQL Server, ORM (Entity Framework Core, ADO.NET), Multi-tenancy
Frontend UI:	Tailwind CSS, PrimeNG, HTML5/CSS3
Tools & Arch:	Git, REST API, Domain-Driven Design (DDD), Repository Pattern, SignalR, Cron Jobs

Education

Associate Degree in Computer Technology (Graduated)
Computer Technology Institute - Syrian Virtual University

Projects

Medical Sessions & Queue Management App (SaaS)

Technologies: Back-end: ASP.NET Core (ABP) | Front-end: Angular (Tailwind CSS, PrimeNG) | Database: SQL Server

- Built a multi-tenant application allowing doctors to manage clinic appointments, queues, and patient records.
- Implemented real-time notifications with SignalR, background Cron Jobs for scheduling, and automated email verification.

Warba Bank Workflow Management System

Technologies: Back-end: ASP.NET Core | Front-end: Angular | Database: SQL Server

- Developed a digital workflow tracking app to handle sequential document sign-offs and departmental approvals.

POS System SaaS Modernization

Technologies: Back-end: ASP.NET Core | Front-end: Angular | Database: SQL Server (Multi-tenant / Multi-DB)

- Transformed a single-tenant Point of Sale system into a multi-tenant SaaS platform supporting separate and shared databases.

E-Commerce Fashion Store

Technologies: Back-end: ASP.NET Core | Front-end: Angular (Tailwind CSS) | Database: SQL Server

- Developed an online clothing store platform featuring product catalog management, cart system, and order processing.

EMenu - Restaurant Menu Management System

Technologies: Back-end: ASP.NET Core | Front-end: Angular | Database: SQL Server

- Created a digital system enabling restaurants to manage electronic menus and orders with user roles and permissions.

Languages

- **Arabic:** Native
- **English:** Intermediate
